

# The **Smartest** **Lending Platform** Now Plays Natively with Symitar.

---

Deploy **Algebrik AI's** cloud-native, AI-powered LOS  
with zero Core migration stress.  
VIP-certified. Seamlessly connected. Ready to perform.

# Finally, an LOS That Feels **Built for Symitar.**

Algebrik AI isn't just another lending platform—it's the first cloud-native, AI-powered LOS designed to work seamlessly with your Symitar Core through Jack Henry's VIP program. That means no clunky middleware, no integration nightmares, and no compromise on performance.

We've built Algebrik to do the heavy lifting—from borrower onboarding to underwriting, compliance, and instant disbursement—while staying in perfect sync with your Core in real time.

This is lending without the lag. Automation without the learning curve.

**Finally, your team gets to focus on members—not manual work.**

## Effortless **Setup, Symitar-Ready**

### **Plug and Play with Symitar + Algebrik**

Bi-directional, real-time read/write access to your core through SymXchange™.

### **Automate Smarter Decisions**

Dynamic workflows + AI-based underwriting reduce manual effort

### **Personalize member Journeys**

Boost conversions and reduce drop-offs with mobile-first design

## What **Symitar® Integration Enables**

### **Real-Time Core Sync**

Read/write access ensures instant updates to member data, balances, and loan status

### **Context-Aware Workflows**

Tailor lending flows based on member data, product, or channel

### **AI-Powered Underwriting**

Go beyond bureaus with cash flow analysis and dynamic rule engines

### **Faster Time to Close**

Shrink approval cycles from days to minutes

### **No Middleware Required**

Eliminate latency and friction—no nightly syncs, no duplicated data layers

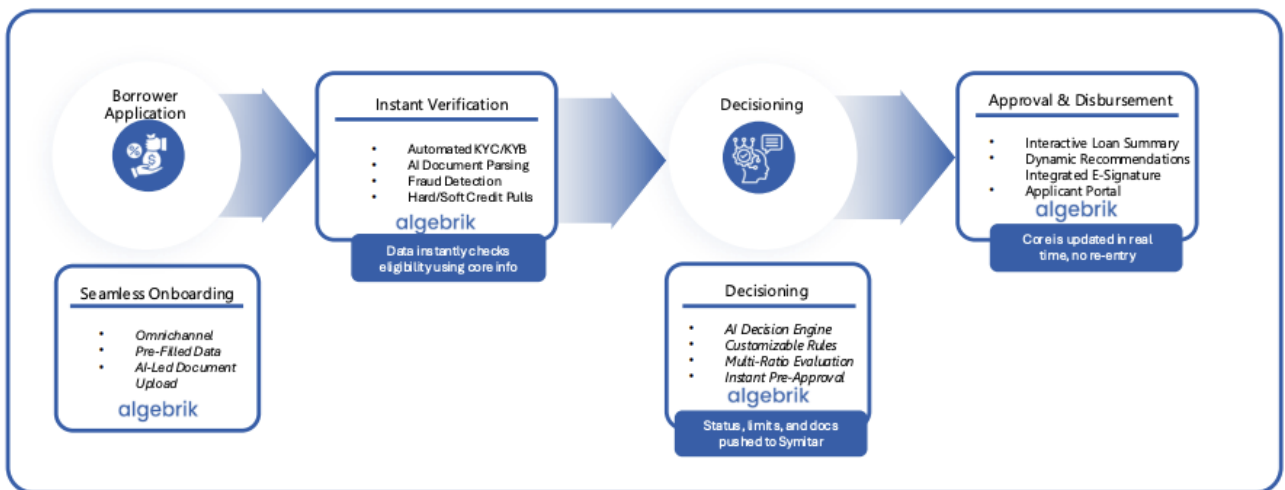

### **Borrower-First Experience**

Intuitive UI with guided flows reduces friction and improves NPS

# Better Connections. **Seamless Operations.**

Feature	Traditional LOS	Algebrik AI
<b>Symitar Integration</b>	Limited or via middleware	Direct via SymXchange™
<b>Data Sync</b>	Delayed (batch-based)	Real-time read/write
<b>Implementation Time</b>	6–12 months	Go-live in 6–10 weeks
<b>AI Automation</b>	Basic or rules-only	Advanced ML + cash flow
<b>UI/UX</b>	Legacy portals	Mobile-first, modern
<b>Custom Workflows</b>	Rigid forms	Drag-and-drop flexibility

## How It Works with **Symitar®**

# Algebrik- The World's first **cloud-native, AI-first digital-era Loan Origination System**

Algebrik AI is the world's first **cloud-native, AI-powered Loan Origination System (LOS)**, providing modern, scalable solutions for credit unions, auto lenders, banks, and lenders of all sizes. Headquartered in New York, we help lenders replace legacy systems with **seamless workflows, smarter decisioning, and faster approvals.**
